A photographic analysis of Aircraft Plant Dolgoprudnyy No 464 in northwest Moscow, USSR, reveals that it has probably resumed aircraft production.

The aircraft probably being produced is the COLT (AN-2). Three probable COLT were identified at the adjacent Moscow/Dolgoprudnyy Airfield (a sod landing area) [REDACTED] Changes indicating resumed production are the construction of a taxiway connecting the plant with a new concrete parking apron and the addition of several small buildings to the plant's facilities.
